

Michelle Bourret has been working at LANL for the past year in a post-masters student position in the Earth and Environmental Sciences Division on the Subsurface Flow and Transport Team. Her work has focused on hydrologic modeling of water and gas flow at the Nevada Test Site. She earned her B.S. in Earth Sciences from UC Santa Cruz and M.S. in Hydrology from New Mexico Tech, and also worked in a water chemistry laboratory at the US Geological Survey in Boulder, CO. Outside of work she enjoys outdoor activities in Los Alamos and surrounding areas, including trail running, hiking, skiing, and camping.
